Roles and Responsibilities

User experience

Designs meet customer's needs to combine interfaces and workflows to enhance user experience. I should be an analytical and creative designer who can grasp user needs and solve problems.

Ultimately, I will make the product more user-friendly and intuitive to attract and retain customers.

- » Understand product specifications and user psychology
- » Define the right interaction model and evaluate its success
- » Keep abreast of competitor products and industry trends
- » Creating wireframes, storyboards, user flows, process flows and site maps to effectively communicate interaction and design ideas
- » Collaborating with Visual
- » Designers and UI Developers to user-friendly products

User Interface Design

The ideal of design should have an eye for clean and artful design, possess superior UI skills, and be able to translate high-level requirements into interaction flows and artifacts and transform them into beautiful, intuitive, and functional user interfaces.

- » Executing all visual design stages from concept to final hand-off to engineering Collaborating with product management and engineering to define and implement innovative solutions for the product direction, visuals, and experience
- » Conceptualizing original ideas that bring simplicity and user-friendliness to complex design roadblocks
- » Present and defend designs and key milestone deliverables to peers and executive-level stakeholders
- » Proficiency in Photoshop, Illustrator, OmniGraffle, or other visual design and wire-framing tools
- » Establish and promote design guidelines, best practices, and standards
- » Ability to present your designs and sell your solutions to various stakeholders.
- » Up-to-date with the latest UI trends, techniques, and technologies

Roles and Responsibilities

FRONT-END DEVELOPMENT

I will be responsible for building the 'client-side' of web and mobile applications. I should be able to translate our company and customer needs into functional and appealing interactive applications. I am interested in creating a user-friendly environment by writing code and moving forward in my career.

Ultimately, I should be able to create a functional and attractive digital environment for the company, ensuring a great user experience.

- Proficiency in HTML5, CSS3, and jQuery for rapid prototyping.
- Ability to handle multiple frameworks like ionic, WordPress, Drupal, etc., Experience working in an Agile/Scrum development process.
- Maintain and improving website content
- Optimize applications for maximum speed to users
- Collaborate with back-end developers and web designers to improve usability
- Help back-end developers with coding and troubleshooting
- Familiarity with Browser and Mobile testing and debugging In-depth understanding of the entire web development process (design, development, and deployment)
- Knowledge of SEO principles
